

## Instructions to install 7ZIP and Kali Linux

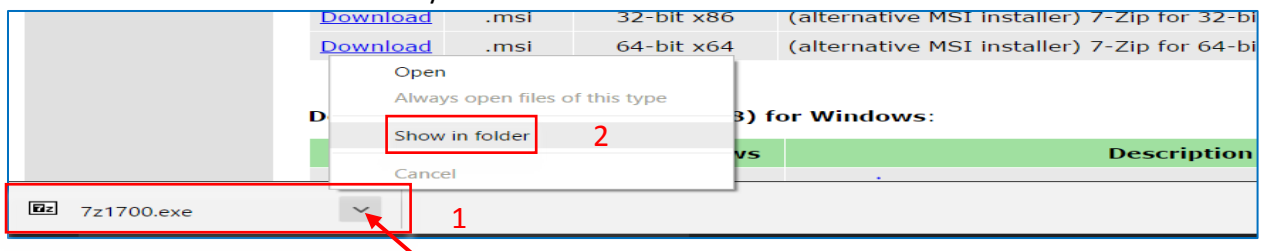

1. We need to download “7 Zip” first so that we can unzip our Kali Linux Virtual Machine for installation
2. Google “7-zip” and select the first option

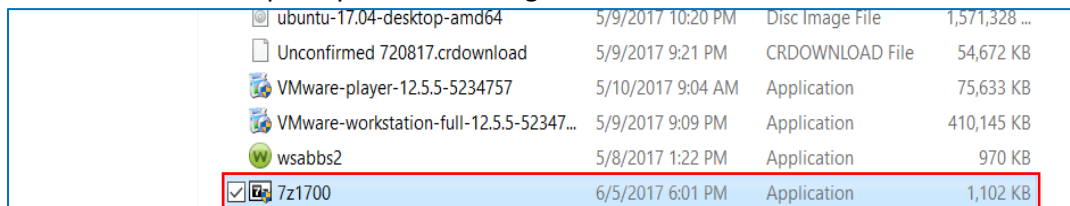

3. Select Download 7-Zip for 64-bit windows x64

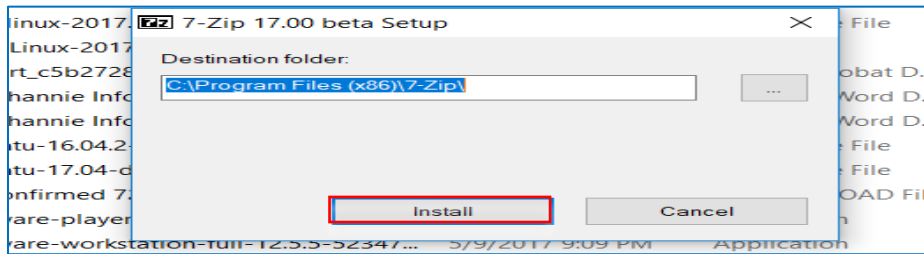

4. Go to the folder of the Download by selection Show in folder

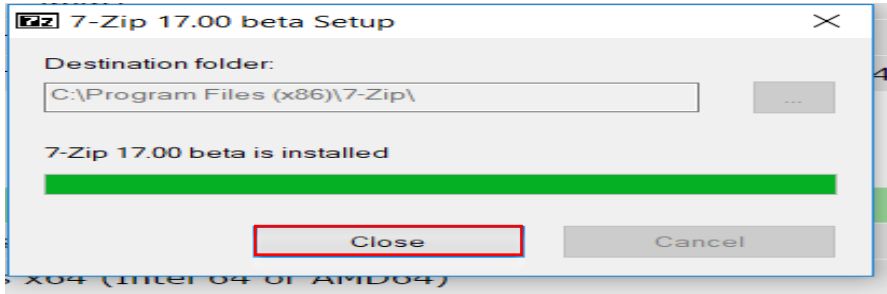

5. Select “7z1700” and open by double clicking

6. Select "Install" to install the application

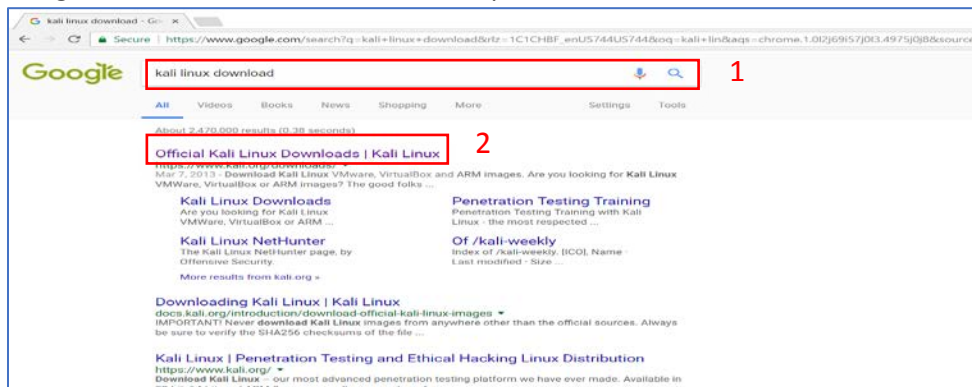

7. Select Close. The application is now installed

8. We now ready to download the Kali Linux Virtual Machine

9. Google "Kali Linux" and select the first option

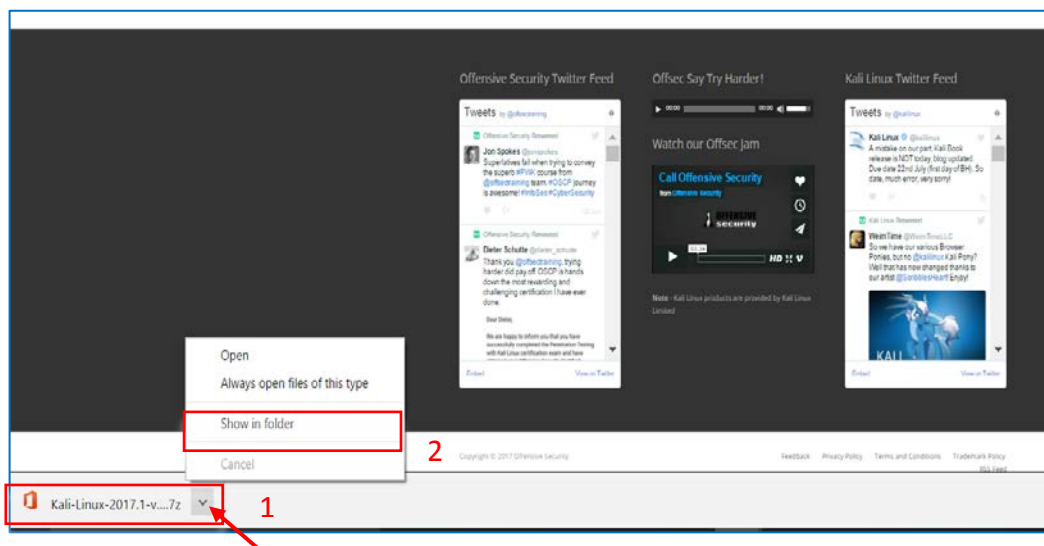

10. Scroll Down and select "Kali Virtual Images(VM)"

11. Select “Kali Linux 64 bits VM” to download the VM
